Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Lilia George provides word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, Agriculture and Trade Analysis Systems Branch, Data Services Center.

Digest

U.S. Agricultural Exports in 1992 Reach Second Highest Level Ever (see p. 2). U.S. agricultural exports rose 10 percent to \$42.9 billion in 1992, a \$3.7-billion gain that included increased exports for most individual products. Exports nearly matched 1981's record value of \$43.3 billion. Wheat, meats, and soybeans recorded the biggest increases from 1991, and Mexico, Japan, and the Republic of South Africa registered the sharpest increases of all countries.

1992 U.S. Agricultural Imports Set Record (see p. 5). Agricultural imports totaled a record \$24.6 billion in 1992, 8 percent above the 1991 level. Competitive imports rose 10 percent to a record \$18.9 billion, and noncompetitive imports increased 1 percent to \$5.7 billion. Strong gains in unmanufactured tobacco, cattle, and vegetable oil imports led to the record level, while some of the large import categories, such as meat and horticultural products, declined or showed little growth.

U.S. Agricultural Exports to Major Markets Rebound in FY 1992 (see p. 7). U.S. agricultural exports totaled \$42.4 billion in FY 1992, up 13 percent from \$37.6 billion the previous year. Japan continued to be the top market, followed by Canada, Mexico, the former Soviet Union (FSU), South Korea, Taiwan, the Netherlands, and Germany. Sixty-three percent of U.S. agricultural exports went to these billion-dollar markets in 1992. The FSU moved up to fourth place as its production declined and its purchases of U.S. agricultural exports rose over 50 percent from 1991, much of it under GSM-102 credit guarantees. Feed grains and products led in export value (16 percent of total), followed by soybeans and products (14 percent), wheat and products (11 percent), and live animals and meat (9 percent).

U.S. Agricultural Exports Under CCC Export Credit Guarantee Programs Declined Slightly (see p. 12). U.S. agricultural exports under the export credit guarantee programs of the Commodity Credit Corporation fell 2 percent in FY 1991 to about \$4 billion. Larger shipments to the former Soviet Union failed to offset declines to other countries, chiefly Iraq, Mexico, and Egypt.

U.S. Agricultural Exports in 1992 Reach Second Highest Level Ever

U.S. agricultural exports rose 10 percent to \$42.9 billion in 1992, a \$3.7-billion gain that included increased exports for most individual products. Exports nearly matched 1981's record value of \$43.3 billion. Wheat, meats, and soybeans recorded the biggest increases from 1991, and Mexico, Japan, and the Republic of South Africa registered the sharpest increases of all countries.

Wheat exports rose \$1.1 billion as tonnage rose 9 percent and the average per ton value of exports rose 24 percent to \$132 per ton. Export volume climbed 2.7 million tons to 33.7 million tons. The biggest gains came in exports to the former Soviet Union (FSU) (a 2.5-million-ton increase), Egypt (965,000 tons), and Pakistan (810,000 tons). China registered the steepest decline, down 1.4 million tons.

Prices rose due to fluctuations in U.S. production and overseas demand. A relatively large 1990/91 (June-May marketing year) U.S. crop held down prices during the first half of 1991. With a smaller crop in 1991/92, smaller than the preceding 2 years, prices rose during 1991. At the end of 1991, the former Soviet Union's need for wheat imports became apparent, and prices continued to rise during the first half of 1992. Although prices at the end of 1992 were below their midyear peaks, they remained substantially higher than during 1991. In January 1991, the average per ton value of U.S. wheat exports was \$75 per ton, then jumped to \$128 per ton by December 1992.

U.S. meat exports rose \$596 million in 1992. Beef made up the largest increase, \$286 million, and pork and poultry meat each added more than \$100 million. Much of the increase went to Japan, due to changes in Japan's import regulations, favorable exchange rates, and a decline in Japan's pork production. Japan's tariffs on beef imports dropped from 70 to 60 percent in April 1992, as agreed to in the 1988 U.S.-Japan Beef and Citrus Agreement. The 70-percent tariff had replaced a system of quotas in April 1991, and beef exports actually fell in 1991 due to high beef stocks in Japan. With stocks lower in 1992,

and the decline in the tariff, U.S. beef exports to Japan rose \$235 million, a 26-percent increase.

U.S. soybean exports climbed \$423 million in 1992, an 11-percent increase, with most of the upturn in sales to the European Community (EC). The U.S. share of world soybean trade jumped during the 1991/92 marketing year to its highest level in 4 years. Poor production in Brazil forced importers to rely on U.S. supplies. Brazil's 1990/91 crop dropped nearly 5 million tons, and production failed to rebound fully in 1991/92. U.S. exports of soybean meal, up \$97 million, also benefited from reduced Brazilian supplies.

Both soybean and soybean meal exports saw their sharpest drop in shipments to the FSU. U.S. soybean sales fell \$113 million, while meal receipts fell \$191 million. Sales of U.S. oilseeds and oilseed products to the FSU had soared in 1991, climbing 80 percent to \$720 million, as the United States captured a larger share of the market through its ability to offer export credit guarantees. However, nearly half of the year's shipments occurred during the last 3 months of 1991, and by October 1992, FSU credit use was decelerating. Russia, the largest importer among the republics, began to have repayment problems with other countries earlier in the year, and by December 1992, had been suspended from USDA's General Sales Manager (GSM-102) credit guarantee program due to a failure to keep current on payments from earlier GSM-102 loans.

Corn shipments to the FSU also fell during 1992, losing \$537 million. With exports of corn, soybeans, and soybean meal lower, total U.S. agricultural exports to the FSU fell \$150 million in 1992, the second largest decline, slightly smaller than China's \$178-million loss.

But in contrast to large losses to China and the FSU, exports rose to Mexico (up \$793 million), Japan (up \$708 million), and the Republic of South Africa (up \$386 million). While the gains to Mexico and Japan were spread across a fairly wide variety of products, corn accounted for virtually all the increase in exports to the Republic of South Africa. (*Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0820*)

1992 U.S. Agricultural Imports Set Record

Agricultural imports totaled a record \$24.6 billion in 1992, 8 percent above the 1991 level.

Competitive imports rose 10 percent to a record \$18.9 billion, and noncompetitive imports increased 1 percent to \$5.7 billion. Strong gains in unmanufactured tobacco, cattle, and vegetable oil imports led to the record level, while some of the large import categories, such as meat and horticultural products, declined or showed little growth.

Unmanufactured tobacco imports reached \$1.4 billion, 83 percent higher than in 1991, and import volume rose 75 percent to almost 400,000 tons. The huge jump occurred in July when the duties on oriental leaf tobacco were removed under the Generalized System of Preferences. This change benefited Turkey whose tobacco exports to the United States rose 125 percent, almost doubling Turkey's total agricultural exports to the United States.

U.S. cattle imports climbed 30 percent to \$1.2 billion. Imports from Canada, mainly slaughter cattle, surged 41 percent to 1.3 million head, valued at over \$900 million. But, imports from Mexico, mainly feeder cattle, fell 5 percent in both value and volume.

Imports of vegetable oils rose 30 percent to over \$1 billion, with volume up 17 percent to 1.4 million tons in 1992. There was substantial growth in imports of coconut oil, olive oil, palm oil, palm kernel oil, and rapeseed oil, all of which accounted for nearly 90 percent of U.S. vegetable oil imports. Increased prices for coconut and palm kernel oil pushed import value higher, but there were also increases in import volume, particularly from Indonesia.

In 1992, the highest valued competitive import was the meat and products category, but its \$2.6-billion value was down 9 percent from 1991, as the value of both beef and pork imports declined. Beef and veal imports totaled \$1.9 billion, a decline of 4 percent. However, the volume of beef and veal imports reached a record 804,000 tons. Lower unit value of imported beef from Australia and New Zealand contributed to the fall in the total value of imported beef. Imports of prepared beef rose sharply from Brazil, but the unit value was much lower than in the previous year.

Pork imports were off sharply to \$620 million due to the attractive domestic prices that constrained import demand. Disruptions in the domestic pork industries of Hungary, Poland, and Yugoslavia slashed import volume by 50 percent. Denmark, a major source of specialty hams, shifted sales to the higher priced European market.

The United States imported less fruit than in 1991, but the value was up about 5 percent. Mexico was the leading supplier of fruit even though shipments fell nearly 20 percent to about 500,000 tons. Melons and citrus fruits led shipments from Mexico. Shipments from Chile were slightly ahead of the previous year, at 450,000 tons, but value was unchanged. Imports of grapes were off by 5 percent. Canned pineapple accounted for nearly 60 percent of all prepared fruit imports, with most of it from the Philippines and Thailand. Imports were particularly strong from Thailand, up 40 percent.

Fresh vegetable imports totaled 1.7 million tons, a decline of 10 percent, and the value was just over \$1 billion, down from \$1.1 billion. Once again, Mexico was the principal supplier, although imports dropped 12 percent from the previous year. Tomatoes, cauliflower and broccoli, cucumbers, onions, and peppers made up over half the total volume of fresh imported vegetables. Poor weather conditions in Mexico reduced tomato imports by 45 percent, onions by 15 percent, and peppers by 6 percent.

Processed vegetable imports gained slightly to \$1.2 billion. Canned mushrooms and olives were the largest imports of prepared vegetables in 1992. The volume of canned mushrooms declined in 1992, and Indonesia was the primary source, displacing China. Olive imports were strong, up 25 percent, and Spain was by far the major source, providing two-thirds of imported olives.

Sugar and sugar product imports rose 7 percent to \$1.1 billion in 1992. Imports of cane and beet sugar were flat in 1992. The primary growth came in confectionery products, up 24 percent by volume, and sweeteners, up 22 percent. Germany was the major source of confectionery products, with 25 percent of U.S. imports.

Noncompetitive imports totaled \$5.7 billion in 1992, only slightly higher than in 1991, but the first year-to-year increase since 1986. The import

volume of noncompetitive products continued steadily upward, but lower commodity prices for coffee and cocoa restrained increases in value. In 1992, coffee imports rose 15 percent to 1.3 million tons, but value fell 8 percent to \$1.7 billion. Cocoa imports remained at the 1991 level.

Banana imports increased 9 percent in both volume and value to 3.7 million tons and \$1.1 billion. Rubber and allied gum imports expanded by 16 percent to over 930,000 tons and \$770 million. (*Joel Greene, Commodity and Trade Analysis Branch, 202-219-0822*)

U.S. Agricultural Exports to Major Markets Rebound in FY 1992

U.S. agricultural exports totaled \$42.4 billion in FY 1992, up 13 percent from \$37.6 billion the previous year. Japan continued to be the top market, followed by Canada, Mexico, the former Soviet Union (FSU), South Korea, Taiwan, the Netherlands, and Germany. Sixty-three percent of U.S. agricultural exports went to these billion-dollar markets in 1992. The FSU moved up to fourth place as its production declined and its purchases of U.S. agricultural exports rose over 50 percent from 1991, much of it under GSM-102 credit guarantees. Feed grains and products led in export value (16 percent of total), followed by soybeans and products (14 percent), wheat and products (11 percent), and live animals and meat (9 percent).

Among commodity exports that changed significantly from 1991, dairy products jumped 118 percent, peanuts rose 55 percent, and wheat advanced 46 percent. Dairy exports to Mexico expanded 150 percent, and to Japan, 60 percent. An \$800-million increase in imports of U.S. wheat by the FSU strengthened these exports. Like U.S. wheat exports, U.S. soybean exports also rose more than \$1 billion (28 percent) from 1991. Exports of U.S. cotton fell 16 percent, led by a 28-percent drop in exports to Japan.

Japan bought 20 percent of total U.S. agricultural exports in FY 1992, almost double the value shipped to Canada. U.S. exports of both feed grains and live animals and meat to Japan each exceeded \$1.7 billion, topped \$900 million for soybeans, surpassed \$600 million for fruit, \$500 million for wheat, and were near \$400 million each for feeds and fodders, vegetables, cotton, and tobacco, and nearly \$300 million for hides and skins.

The value of U.S. agricultural products shipped to Japan totaled \$8.4 billion, up from \$7.7 billion in 1991. Japan was either the first- or second-ranked market for each major commodity group (exports totaling \$1 billion or more). Japan increased its imports of U.S. wheat from \$401 million in 1991 to \$542 million, an 8-percent increase in quantity and 25-percent increase in unit value. Imports of U.S. live animals and meat rose from \$1.5 billion to \$1.8 billion. While imports of U.S. live animals declined \$30 million, imports of U.S. beef and veal rose \$127 million as

Japanese beef stocks fell and the 70-percent import tariff declined to 60 percent on April 1, 1992. Japanese imports of U.S. pork rose \$70 million. Japan's imports of U.S. cotton declined from \$536 million to \$386 million in the face of competition from synthetic fabrics and rising cotton goods imports. Imports of U.S. hides and skins also slipped, from \$319 million to \$281 million.

Canada's purchases of U.S. agricultural products increased \$400 million to \$4.8 billion, continuing a trend encouraged by declining tariffs under the Free Trade Agreement. Canada took 11 percent of U.S. exports in 1992 and 1991. Canada is the top market for U.S. vegetable, fruit, and poultry exports and the second-ranked market for feeds and fodders, rice, and peanuts.

Mexico's strong economic growth helped boost its purchases of U.S. exports by 27 percent to nearly \$3.7 billion in value. Mexico increased imports of most U.S. commodity groups except vegetables, which declined 13 percent. Mexico remained the top market for U.S. exports of fats, oils, greases, and dairy products and became the top market for seeds and the second largest market for U.S. feed grains.

FSU purchases of U.S. agricultural exports rose 53 percent (from \$1.8 billion to \$2.7 billion), advancing that market from fifth to fourth place. Its imports of U.S. wheat and flour jumped from \$200 million to more than \$1 billion, making it the largest market for U.S. wheat exports. USDA's GSM-102 credit guarantees increased from \$250 million in 1991 to \$800 million in 1992, contributing to the larger imports of U.S. grain, as did a fall in FSU grain production in 1991/92. U.S. feed grains, wheat, and soybeans constituted over 90 percent of U.S. exports to the FSU in 1992 as well as in 1991.

South Korea purchased \$2.2 billion in U.S. agricultural exports, up 2 percent from 1991. South Korea remained the top market for U.S. hides and skins and the second largest market for U.S. raw cotton exports. South Korea boosted its imports of U.S. fats, oils, and greases 53 percent for 1992, advancing it from seventh place in 1991 to third in 1992.

Taiwan purchased \$1.9 billion worth of agricultural imports, up from \$1.7 billion, and was the fourth largest market for U.S. feed grains, vegetables,

fruit, and hides and skins, and, in spite of significant increases in purchases, was the fifth-ranked market for U.S. soybeans and tobacco. Taiwan was the fourth-largest U.S. market for soybeans and hides and skins in 1991.

The Netherlands, the initial destination for \$1.8 billion of U.S. exports, was the second largest market for U.S. soybeans, the third largest for tobacco and feeds and fodder, and the fifth largest for feed grains. Many of these exports were routed from the Netherlands to other destinations. The Netherlands was the leading initial destination for U.S. peanut exports during 1992 and second to Canada in 1991.

Germany took \$1.1 billion of U.S. exports, down 4 percent from 1991, but maintained its position as the top market for U.S. tree nut exports and the second largest market for unmanufactured tobacco. It is also a major market for exports of U.S. soybeans, fruit, vegetables, and feeds and fodders.

Feed Grains and Soybeans Lead Commodity Exports

Feed grains, soybeans, and wheat led U.S. commodity exports in 1992, followed by live animals and meat, vegetables, fruit, cotton, tobacco, hides and skins, poultry and products, and feeds and fodders. Feed grains, soybeans, and wheat made up 41 percent of U.S. agricultural export value in 1992 and 39 percent in 1991. Feed grains and products accounted for 16 percent of the value (\$6.8 billion) in 1992 and 18 percent in 1991. Japan, traditionally the largest market, took 26 percent of U.S. feed grain exports during 1992 and 25 percent in 1991. Mexico was the second largest market in 1992 and third in 1991.

Exports of soybeans and products, 14 percent (\$6 billion) of total U.S. agricultural export value in 1992 and 12 percent during 1991, rose \$1.3 billion (28 percent) from 1991. Japan and the Netherlands, the largest customers, received 15 and 12 percent, respectively, of U.S. soybean exports in 1992. The FSU increased its purchases of U.S. soybeans and products by 42 percent, maintaining third place. Seventy-five percent of these imports (nearly \$500 million) were financed with GSM-102 credit guarantees.

Wheat and wheat products made up 11 percent (\$4.5 billion) of all U.S. agricultural commodity

exports during 1992, up from 8 percent in 1991. In 1992, a fivefold increase in FSU purchases of U.S. wheat, primarily from purchases under the Export Enhancement Program and the GSM export credit guarantee program, elevated the FSU to the leading market. Japan, which increased its imports of U.S. wheat and products \$141 million (35 percent), became the second-largest U.S. wheat market. During 1991, Japan was the top market for U.S. wheat, taking 13 percent, and China was second with 11 percent. Although China increased its imports of U.S. wheat \$40 million, it moved to fourth as Egypt boosted its imports of U.S. wheat \$130 million from 1991, rebounding from diminished imports in 1991 to nearly 1 million metric tons more than it took in 1990.

Japan purchased 47 percent of the \$3.8 billion of live animals and meat the United States exported during 1992, up from 45 percent in 1991. Canada and Mexico imported 18 and 14 percent, respectively, in 1992. Mexico boosted its imports of U.S. live animals and meat more than \$150 million, partially because of strong economic growth and rising incomes that have expanded red meat consumption.

Cotton constituted 5 percent (\$2.2 billion) of U.S. commodity exports in 1992 and 7 percent in 1991. Japan and South Korea remained the leading markets, together taking 34 percent of U.S. cotton exports while trimming their purchases 21 percent from 1991. U.S. cotton exports were down from \$2.6 billion in 1991, primarily because of large exportable supplies among foreign exporters such as the FSU, Pakistan, and China.

Exports of fruit and vegetables increased to \$2.8 billion each. Together they made up 13 percent of U.S. commodity exports, as they did in 1991. Canada took 35 percent of these U.S. exports, followed by Japan who purchased 19 percent. Mexico maintained its traditional third place in the vegetable market, as did Hong Kong in the fruit market. Taiwan edged the United Kingdom from fourth place in the vegetable market by increasing its imports \$26 million to a total of \$110 million, helped by strong economic growth and higher personal income. Taiwan boosted its imports of U.S. fruits \$530 million (54 percent), maintaining fourth place in that market.

Japan imported 22 percent of the \$1.6 billion of U.S. unmanufactured tobacco exports, up 12

percent from its imports in 1991, while Germany purchased 14 percent, down 15 percent from 1991. Turkey, which has expanded its tobacco-processing facilities and boosted its manufactured tobacco exports, more than doubled its imports of U.S. tobacco, advancing from the seventh to the fourth largest U.S. market. Taiwan advanced from the 11th largest U.S. market in 1991 to 5th in 1992 by boosting its imports of U.S. tobacco from \$51 million to \$78 million. This reflects an increase in U.S. tobacco in locally produced cigarettes and an attempt to meet the consumer preference for higher-quality American-type cigarettes, which use a blend of flue-cured, burley, and oriental tobacco.

The Pacific Rim markets of South Korea, Japan, and Taiwan together purchased 72 percent of the \$1.3 billion of U.S. exports of hides and skins in 1992 and 75 percent in 1991. South Korea bought over 40 percent of these U.S. exports in 1992, followed by Japan, Mexico, Taiwan, and Canada. China increased its imports of U.S. hides and skins by \$4.2 million and advanced from the 16th largest market in 1991 to 10th, reflecting strong growth in GNP.

Canada surpassed Japan to become the leading market for U.S. poultry exports. Mexico moved up to the third largest market and Hong Kong slipped from third to fourth. All four of these top markets increased their imports of U.S. poultry and products, taking 63 percent of the \$1.2 billion in U.S. poultry and products exports in 1992, up from 60 percent in 1991. The United Kingdom more than tripled its imports of U.S. poultry, jumping from 26th place in 1991 to 9th in 1992. UK turkey production had declined, partly because of disease problems, and imports of turkey and broiler parts rose to meet the growing demand for poultry meat.

Japan, the largest importer of U.S. feeds and fodders, boosted the value and volume of its imports 12 percent, taking 35 percent of this \$1.1-billion export category in 1992. Canada, the Netherlands, and Mexico were the next largest markets, maintaining their 1991 positions. Germany expanded its imports from \$12.3 million in 1991 to \$19.2 million (a 55-percent jump in value and a 130-percent increase in volume), advancing from the 13th to the 9th largest market. *(Cecil W. Davison, Crops Branch, 202-219-0840)*

U.S. Agricultural Exports Under CCC Export Credit Guarantee Programs Declined Slightly

U.S. agricultural exports under the export credit guarantee programs of the Commodity Credit Corporation (CCC) fell 2 percent in FY 1991 to about \$4 billion. Larger shipments to the former Soviet Union failed to offset declines to other countries, chiefly Iraq, Mexico, and Egypt.

The CCC programs consist of the Export Credit Guarantee Program (also known as the GSM-102 program) and the Intermediate-Term Export Credit Guarantee Program (GSM-103). These programs assist U.S. agricultural exports by facilitating extension of private, commercial credit to foreign importers for the purchase of designated U.S. agricultural commodities. Under GSM-102, the CCC guarantees repayment of private credit extended for up to 3 years, while GSM-103 covers credit extended for 3-10 years. Under both programs, repayment of 98 percent of the principal is guaranteed; the amount of interest repayments that is guaranteed differ between GSM-102 and -103. The GSM-102 program is much larger than GSM-103. However, even though exports under GSM-102 increased slightly, they were offset by lower shipments under the GSM-103 program.

Twenty-one countries imported commodities under either one or both of the GSM programs in FY 1991. The largest destination was the Soviet Union (which ceased to exist in December 1991). The U.S. Department of Agriculture made a GSM-102 program operational to that market in January 1991, after which almost all Soviet imports from the United States were under the program. Chief among commodities shipped were corn, soybean meal, and wheat. Shipments to the Soviet Union accounted for almost 40 percent of total GSM exports. In late September 1991, coverage of 100

percent of the principal (rather than 98 percent) was provided for subsequent sales to the former Soviet Union.

Mexico, the second largest importer under the GSM programs, accounted for about 26 percent of total GSM exports, with shipments of mostly soybeans, sorghum, and corn. Algeria was the third largest importer, with 13 percent of the total, chiefly of wheat, corn, and soybean meal. Algerian importers were also the largest purchasers under the GSM-103 program, buying additional corn, soybean meal, and sunflowerseed oil.

A variety of commodities were shipped under the GSM programs. Corn exports under GSM-102 and -103 accounted for \$1.37 billion, 28 percent of all FY 1991 corn exports. The Soviet Union alone purchased 70 percent of all corn shipped under the programs. Mexico was second, accounting for another 13 percent, and Algeria was third.

Wheat was the second largest commodity shipped under both GSM programs, with shipments of about \$793 million, about 28 percent of the export value of U.S. wheat shipped in FY 1991. Top destinations for wheat shipments under GSM programs were the Soviet Union, Algeria, and Korea. Several importers purchased wheat under these programs in conjunction with the Export Enhancement Program.

Soybean exports, at \$472 million, made the crop the third largest commodity shipped under the GSM-102 program. The GSM-103 program shipped no soybeans. The GSM-102 program accounted for less than 14 percent of U.S. soybean export value. Mexico alone accounted for about two-thirds of the soybean shipments. *(Mark E. Smith and Linda Beeler, Commodity and Trade Analysis Branch, 202-219-0820)*

1/ Based on exporters' reports to the Foreign Agricultural Service. Therefore, values may not completely reflect exports made under these programs.

2/ Excludes program exports not technically classified as agricultural products (leather, lumber, plywood, veneer, wood chips, and wood pulp). GSM-102 importers of these commodities in FY 1991 were Algeria (\$40,440), Korea (\$6,356), and Mexico (\$73,539).

3/ Columns may not add due to rounding.

INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, January-December 1991 and 1992, and December 1992	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, January-December 1991 and 1992	A-69
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, January-December 1991 and 1992	A-70
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, January-December 1991 and 1992	A-71
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, January-December 1991 and 1992	A-72
Imports		
B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, January-December 1991 and 1992, and December 1991 and 1992	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, January-December 1991 and 1992, and December 1992	B-5
Prices		
C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

Central and Eastern European Agriculture Adapts to Open Markets

Number 10, February 1993

Contact: Jason Lamb, (202) 219-0620

Central and Eastern European (CEE) agriculture underwent dramatic change during the last 3 years. The introduction of market pricing, open borders, and increased freedom of entry and exit for firms occurred without the institutional and legal structures necessary for a market economy. Progress varies widely by country, but the northern countries of Poland, Hungary, and the Czech and Slovak Republics are much further along than the southern countries of Bulgaria, Romania, and Yugoslavia. The effect of market reforms on agriculture is documented in the 76-page report, *Agricultural Policies and Performance in Central and Eastern Europe, 1989-92* (FAER-247).

Many CEE countries shifted from pre-reform tight agricultural supplies or outright shortages to post-reform surpluses. Food availability and diversity have increased appreciably. Food prices have risen in nominal terms, but generally have lagged behind the overall inflation rate, reducing the prices of many food items relative to other goods and services.

But, farm financial performance has been poor. Food prices have risen, but less than farm input prices. Many issues regarding land and asset ownership in the farm sector remain unresolved, leading to uncertainty for planting and production. Consumer demand for agricultural products is depressed due to the sudden rise in consumer prices, while nominal income growth has been restricted through wage/pension caps. In addition, where the farm sector previously enjoyed unlimited demand for its products, it now faces stiff competition from a wider array of consumer products.

U.S. Export Opportunities

The value of U.S. agricultural exports to CEE countries dropped in 1991 due to the CEE's lack of hard currency needed to buy U.S. agricultural products and, more important, the CEE surplus of agricultural products from lower domestic demand and bumper grain harvests. U.S. agricultural exports of \$225.3 million in 1991 were well below the 1990 level of \$536.2 million. The level of U.S. agricultural exports has been bolstered by

food aid granted to the CEE area, especially to Romania. CEE markets should stabilize and diminish the need for food aid.

Long-term export opportunities exist for U.S. agricultural inputs, machinery, and processing facilities, as well as soybeans and meal, cotton, tobacco, rice, certain specialty foods (nonindigenous fruits and fruit products, nuts), and consumer-ready foods. In addition, U.S. expertise in financing, farm management, and food processing is needed in the CEE countries. More short-term food aid may be needed in Albania, Romania, and some of the former Yugoslav republics.

Agricultural Production Steady as Domestic Demand Drops

The problems faced by the CEE agricultural sector had a smaller impact on production in 1991 than economists expected. Gross agricultural production in the region declined by 4.9 percent compared with 1990. Production levels in 1991 for most grains exceeded their 1986-90 averages, while many livestock and oilseed products fell below their 1986-90 levels.
